

FOSDEM 2011: Saturday

	Janson Keynotes	
10:00	Welcome to FOSDEM 2011	← Eben Moglen
10:30	Political liberty and Software Freedom	
11:00		
11:30		
12:00	LLVM and Clang	← Chris Lattner
12:30		

	Janson System	Chavanne Web
13:00		
13:30		
14:00	DevOps? more than marketing	The life of a Firefox feature
14:30		
15:00	systemd: beyond init	Qt Webkit goes Mobile
15:30		
16:00	I'm going M.A.D.	
16:30		
17:00		
17:30		
18:00		
18:30		

	Ferrer Lightning talks	Lameere Embedded	H.1301 Mozilla	H.1302 Distributions	H.1308		H.1309 XDesktop	H.2213 MySQL	H.2214 GNU	
13:00	- Sirius	Arduino/ AVR: amforth	Mozilla in 2011			13:00	Opening	MySQL 5.5	Org-mode for Emacs	13:00
13:30	- Magellan		Mozilla Foundation			13:30	KDE education	HandlerSocket		13:30
14:00	- Libre graphics magazine		Firefox 4	COMAR	Good downstream					
14:30	- Coreboot	XMOS Multicore Embedded Hardware		NixOS for declarative deployment and testing	Swimming upstream	14:00	Community anti-patterns	I/O prefetch for InnoDB	Dynamic Hacking with Guile	14:00
14:30	- flashrom					14:30		XtraDB performance show		14:30
14:30	- 0MQ		In-Tab UI							
15:00	- Neo4j	Flukso community metering		Amazing openSUSE	Downstream packaging collaboration	15:00	Gallium state trackers	Data recovery	GNU Parallel	15:00
15:30	- iRail					15:30	Group Photo			15:30
15:30	- Seeks		HTML5 is here							
16:00	- Pagekite	DaVinci dm365 for home automation		Gentoo's RelEng and catalyst use	HP & comm. Linux distros	16:00	Intro to Qt and QtQuick	XtraBackup	GNU Autotools	16:00
16:30	- Apache Etch					16:30		MariaDB query optimizer	GNU Network Security Labyrinth	16:30
16:30	- Forban		SUMO		Model checking the kernel?		Vala? are you kidding me?	MySQL 5.5 replication		16:30
17:00	- Sahi	Milymist, electronics openness		Gentoo's Reform and future	Comparative analysis of evolving libre software	17:00		Tungsten	Power, freedom, software	17:00
17:30	- CyaSSL		Analyzing Crash Data			17:30	E17	Multimaster failover	Non-free software advertisement	17:30
17:30	- Cloud9 IDE							Overview of Maatkit	GNU recutils	17:30
18:00	- Aalto-1	Bootng and upgrading a flashless system		Gentoo Q&A session	Mancoosi tools for analysis and QA of distros	18:00	KDE abstracted my abstraction layer	Multimaster replication		18:00
18:30	- Chicken					18:30				18:30
18:30	- Scala									
	AW1.105 Security	AW1.117 GNUstep	AW1.120 Mono	AW1.121 Jabber/XMPP	AW1.124 Data analytics		AW1.125 Free Java	AW1.126 BSD	UA2.114 Certification	Guillissen Certification
13:00		Developer Meeting	F# and MonoDevelop	Power of XMPP	Welcome	13:00	Welcome	ZFS in open source operating systems		LPI Why ?
13:30	SC and crypto jungle	Étoilé		Jabber-RPC	Hadoop Pig	13:30	State of OpenJDK			LPI How ?
14:00	SSH libraries, SSH vs TLS		Manos	XMPP and security	Mahout	14:00	IcedRobot	mk-configure	BSD Associate + TYPO3 exam sessions	LPI exam session #1
14:30	libcurl	LanguageKit		XMPP experts Q&A	MongoDB & Gephi	14:30				
14:30	CyaSSL	EtoileText	Web Objects	XMPP conf calls	Web data					
15:00	Fribid and browser sec	Fast flexible UI development with EtoileUI	Making happy developers	CiviCRM and XMPP	Datalift	15:00	Distributions	Bringing OMAP3 into FreeBSD		
15:30	EJBCA and OpenSC		Mono pkgng in Debian	XMPP conf calls	GNU Data Language	15:30	Packaging nightmare			
15:30					PimPy		Pkging guide			
16:00	PKCS#11 tokens	UIKit/iOS		Yate client	scikit.learn	16:00		Lua meets BSD	LPI exam session #2	
16:30	How to store trust	Simple WebKit, QuantumSTEP	Mono C++ Interop	XMPP - cloud 2.0	PyF	16:30	IcedTea-Web project			
17:00	SystemTap	DBusKit	Mono's new garbage collector	Federated Social Netwkg	Wikipedia	17:00	IcedTea JavaWS	BSD-licensed Toolchain Status		
17:30	Dynalugin				Lucene and S4	17:30				
18:00	OpenSC 2015	Obj-C support in GCC 4.6	Graph DB access layer for .NET/Mono		Seeks	18:00	Open sourcing Java	Introduction to FreeBSD		
18:30	Open panel discussion	GS/OpenBSD	CloudB		Graph DBs	18:30	Rise and fall and rise			
18:30		GORM and GS theming			NoSQL databases					

FOSDEM 2011 - Sunday

	Janson Languages	Chavanne Web frameworks		Ferrer Lightning talks	Lameere Embedded	H.1301 Mozilla		H.1302 Distributions	H.1308	H.1309 CrossDesktop		H.2213 PgSQL	H.2214 LibreOffice	
09:00			09:00		BareBox: booting Linux fast and fancy		09:30	Ada	sssd		09:30		Accessible Authoring	09:00
09:30			09:30			XULRunner applications	09:30		Improving rollback		09:30		Hacking LibreOffice	09:30
10:00	PL/Parrot	Apache Wicket	10:00	- Mediamosa - Android video stmg - Sinatra	Linaro	about: volunteers	10:00		Pardus and pisi		10:00	Async notifications	Marketing to developers	10:00
10:30			10:30				10:30	Forking	Zentyal	KDE on Windows	10:30		Localisation	10:30
11:00	Objective-C	Django's architecture	11:00	- Rails admin - KDevelop - Timebank	Qt tales from the embedded trenches	Messaging/ Thunderbird	11:00	Simple cross- distribution installation framework ?	Debian GNU/ kFreeBSD	libfolks	11:00	PgSQL extension development	Understanding the Writer core	11:00
11:30		Cloud	11:30			Gloda	11:30				11:30		Wikihelp	11:30
12:00	Practical Go programming	Infinispan	12:00		MeeGo		12:00			Project Bretzn	12:00	Writing a user- defined type		12:00
12:30			12:30				12:30	Sharing package descriptions	piuparts. debian.org		12:30		Easy hacks	12:30
13:00			13:00	Keysigning	OpenBricks, an embedded linux platform	Firefox startupspeed	13:00	Application Installer	Distributed build of RPMs	Games with Gluon	13:00		Document Foundation	13:00
13:30	Office	Cloud	13:30			Mozmill Crowd	13:30				13:30		Design team	13:30
14:00	Liberating Open Office development	Facebook Messages	14:00	- Agora voting - Village-telco - XWiki	Cold boot attacks		14:00	Collaboration Manifesto	Configuration data upgrade	Grilo	14:00	pgpool-II version 3	Impress hacking	14:00
14:30			14:30		Really fast x86 boot	Lightning Talks	14:30	Debian		Next desktop is the browser	14:30			14:30
15:00	WebODF	Disaster recovery with rear	15:00	- Mongrel2 - PubSub- Hubbub - UC Engine	Enlighten-ment Foundation Libraries	WoMoz	15:00	ZYpp	Make QA engineers start drooling	Let me teach you how to fish	15:00	PostgreSQL Extension Network	Helping out in the Calc core	15:00
15:30			15:30				15:30	Gumby			15:30		Writing import filters	15:30
16:00	Calligra under the hood	Massively scalable cloud	16:00	- EducOOo - FreeMedForms - Thousand Parsec	Creating secure web UIs for embedded		16:00	APT-PBO	One source	Introduction to WebKit	16:00	MVCC for clustered databases	A new build system	16:00
16:30	Closing		16:30				16:30		Flexible worker pool	Closing	16:30		Difficulty of forking	16:30
17:00	How kernel development goes wrong	← Jonathan Corbet	17:00				17:00				17:00			17:00
17:30	EOF		17:30				17:30				17:30			17:30
18:00			18:00				18:00				18:00			18:00

FOSDEM venue:
ULB Campus Solbosch
Avenue Franklin D. Roosevelt 50
1050 Brussels, Belgium

FOSDEM 2011 - Sunday

	AW1.105 Virtualization	AW1.120 C&SM	AW1.121 A11y		AW1.124 OS Telephony	AW1.125 OS Telephony		AW1.126 Perl	Guillissen LPI	
09:00	Welcome	A tale of disaster recovery	How does a blind person see ... ?	09:00	Welcome		09:00	Using Perl6 today		09:00
09:30	Intro			09:30	Asterisk Development Intro	Jigsaw	09:30	Curses::Toolkit		09:30
10:00	VPNs in EC2	Abstraction, Formalization, Standardization	A11y in WebKitGTK+	10:00	Digital PSTN with Askterisk	Modular Java	10:00	Perl data structures		10:00
10:30	P2P VPN			10:30		Project Coin	10:30			10:30
	Marionnet									
11:00	FairVPN	Application deployment with Chef	A11y in OCRFeeder	11:00	Mobicents 2.0		11:00	Tracing Perl	LPI exam session #3	11:00
11:30	Virtualbricks			11:30		Hotspot and SystemTap	11:30	Template::Zoom		11:30
	VDE 3				Kamailio					
12:00		Config mgmt for development environments	GNOME 3.0 accessible	12:00		JamVM	12:00			12:00
12:30	Brainstorming			12:30	Unifying SIP and web with Lua	IndyDroid	12:30	Moose		12:30
13:00		Gepetto		13:00	XiVO IPPBX OpenHardware		13:00			13:00
13:30				13:30		Azul into open source	13:30	Padre Perl IDE	LPI exam session #4	13:30
14:00	Ganeti 2.4	Foreman	Orca	14:00	SIP communicator	Free Java	14:00	Packaging Perl		14:00
14:30	SPICE			14:30						14:30
	USB redirection				Askterisk SCF Dev interfaces	PHP reboot	14:30	Processing XML		
15:00	View-OS	Config mgmt for developers	Opengazer, dasher and ticker	15:00			15:00			15:00
15:30				15:30	Rich VoAIP: SIPSIMPLE SDK	Rhino and RingoJS	15:30	Dancer	LPI exam session #5	15:30
16:00	Brainstorming		odt2daisy and odt2braille	16:00		AltosUI	16:00	SPORE		16:00
16:30		Fusion-Inventory and GLPI		16:30	Yate and YateClient	Gervill low latency	16:30	Code, release, market		16:30
	Wrap-up				Closing					
17:00		MS Windows management with OPSI		17:00		Garbage collection	17:00			17:00
17:30				17:30			17:30			17:30
18:00				18:00			18:00			18:00
